---

Elizabeth – I have comments and questions about the Sand Island draft. I want to make sure we have time to discuss before the draft goes public. What's the schedule for issuing public draft?

**Subject:** HI permits of interest

Hi Ken,  
So, here's the status of the permits you requested:

**Honouliuli** – issued **final** on 2/28/14; minor modification 4/28/14 to address typos (see attached).

- Chlordane and dieldrin – no effluent limits in previous permit; current permit includes effluent limits based on WQS x dilution factor.
- Compliance schedule included with interim limits for new enterococcus limits.
- Includes performance-based limit for ammonia.

**Sand Island** – **DRAFT**, not yet public-noticed, and may need to be revised (see attached).

- Chlordane and dieldrin – draft permit includes less stringent limits than those included in previous permit.
- Compliance schedule included with interim limit for new monthly average enterococcus limit (daily maximum kept the same as in previous permit).
- Includes performance-based limit for ammonia.

**Hilo** – **public noticed** on 1/9/14 (see attached).

- Compliance schedule with interim limits for new criteria end-of-pipe limits (no dilution) for nitrate + nitrite.
- Also, includes new limits for cyanide and enterococcus.

Let me know if you have any more questions. I'm here to help!

-Elizabeth
